Paired solver results on identical traffic inputs
Five solver seeds; bars show sample SD, not confidence intervals

4-node complete mesh: 15 legacy cases

Single Major Expressway Bottleneck
Adjacent Dual Arterial Bottleneck
Non-Adjacent Dual Arterial Bottleneck
Radial Inbound Morning Commute Peak
Radial Outbound Evening Egress Surge
Commercial District Central Rush
Construction Capacity Reduction Incident
Stadium Special Event Outflow Spike
School Zone Perimeter Dropoff
Asymmetric Directional Flow Pattern
Inclement Weather Network Slowdown
Cross-Town Transit Corridor Surge
Late Night Heavy Freight Arterial
Distributed Triple Bottleneck Peak
Off-Peak Nighttime Low Baseline

5-node complete mesh: 15 legacy cases

Single Major Expressway Bottleneck
Adjacent Dual Arterial Bottleneck
Non-Adjacent Dual Arterial Bottleneck
Radial Inbound Morning Commute Peak
Radial Outbound Evening Egress Surge
Commercial District Central Rush
Construction Capacity Reduction Incident
Stadium Special Event Outflow Spike
School Zone Perimeter Dropoff
Asymmetric Directional Flow Pattern
Inclement Weather Network Slowdown
Cross-Town Transit Corridor Surge
Late Night Heavy Freight Arterial
Distributed Triple Bottleneck Peak
Off-Peak Nighttime Low Baseline

6-node complete mesh: 15 legacy cases

Single Major Expressway Bottleneck
Adjacent Dual Arterial Bottleneck
Non-Adjacent Dual Arterial Bottleneck
Radial Inbound Morning Commute Peak
Radial Outbound Evening Egress Surge
Commercial District Central Rush
Construction Capacity Reduction Incident
Stadium Special Event Outflow Spike
School Zone Perimeter Dropoff
Asymmetric Directional Flow Pattern
Inclement Weather Network Slowdown
Cross-Town Transit Corridor Surge
Late Night Heavy Freight Arterial
Distributed Triple Bottleneck Peak
Off-Peak Nighttime Low Baseline
